CONTENTS

George Okere

Evaluating design-bid-build and design-build delivery methods based on scope definition and differing site conditions 70

Research Article

Wim H. Verburg, Johannes I.M. Halman and Hans Voordijk

The development of a design-for-assembly method for construction and infrastructure projects. 87

Research Article

Noor Hussein Farooq Albayati and Saman Aminbakhsh

Resource allocation capabilities of commercial project management software packages for resource leveling and resource constrained project scheduling problems: A comparative study 104

Research Article

Sema Comu, Rasa Moeini, Ozan Elibol and Jiayu Chen

Bayesian belief network model for quantifying the delay risk of marine construction projects in developing countries 124

Research Article
